Cat-Nr: BW07

Artikel info:BiegTech

Area of application

The BWM07 230 V universal motor is suitable for operating grinding, brushing, cutting and milling tools in conjunction with flexible shafts. The motor can also be used for special drives.

Application

Universal motor with infinitely variable speed control and digital electronics for constant speeds. It is technically sophisticated, low-maintenance, service-friendly and economical. The universal motor is protected by a tube stand. Thanks to the overload protection, the safety electronics automatically switch to cooling mode when the critical temperature is reached. Please note that the motor cannot bear loads in cooling mode and the drive only starts up again to the set speed after switching it off and on. The restart protection ensures that the universal motor does not restart automatically after a power failure. The BiegTech electric drives bear the CE mark, are fully insulated and correspond to protection class II. They also comply with the EC Machinery Directive, the EC Low Voltage Directive and electromagnetic compatibility. In addition to the universal motor, the scope of delivery includes a power cable and 1 flexible shaft of your choice.

Technical data

Model name - BWM07 230 V
Dimensions (L x W x H) - 300 x 75 x 140 mm
Voltage - 230 volts, 50 to 60 Hz
Power consumption - 1600 watts
Speed range - 7500 to 19000 rpm
Flexible shaft connection - M10
Length power cable - 2 m
Net weight - approx. 6 kg

Price : 789,00 EUR [incl. 0% VAT plus shipping costs]

Options :
